

Luis Curbelo III

Field Safety & Compliance Coordinator | Technical Operations Specialist

New Britain, CT | (843) 263-4222 | luis.a.curbelo@outlook.com

<https://www.linkedin.com/in/luisman61/>

PROFESSIONAL SUMMARY

Safety-focused field operations professional with 13+ years of experience in compliance verification, jobsite safety oversight, hazard identification, corrective action coordination, and installation inspection across large-scale technical deployment and systems integration environments. Background includes large-scale radar sensor and security camera deployments, fire alarm and access control systems, and multi-site field operations. OSHA 30-Hour and 40-Hour EM 385-1-1 trained, with practical field experience enforcing safe work practices, documenting safety deficiencies, and coordinating corrective actions with field personnel and project leadership. CompTIA A+ and Security+ certified.

CORE COMPETENCIES

- | | | |
|--------------------------------------|------------------------------------|--|
| • Workplace Safety Compliance | • Risk Mitigation | • Installation Compliance Verification |
| • Field Safety Inspections | • Incident Prevention | • Operational Accountability |
| • Jobsite Safety Oversight | • Corrective Action Coordination | • Field Operations Safety |
| • OSHA Awareness | • Compliance Auditing | • Safety-Conscious Work Practices |
| • Hazard Identification & Assessment | • Safety Documentation & Reporting | • Continuous Improvement Initiatives |

AREAS OF EXPERTISE

- | | | |
|-----------------------------------|----------------------------------|---------------------------------|
| • Jobsite Safety Inspections | • Fire Alarm Systems | • Safety Audit Documentation |
| • OSHA-Conscious Field Operations | • Access Control Systems | • Field Compliance Reporting |
| • Hazard Identification | • CCTV & Security Camera Systems | • Root Cause Analysis |
| • PPE Compliance Enforcement | • Radar Sensor Deployment | • Incident Reporting |
| • Fall Protection Awareness | • Structured Cabling | • Windows / Microsoft O365/M365 |
| • Electrical Safety (Low Voltage) | • Corrective Action Tracking | • Field Reporting Platforms |

PROFESSIONAL EXPERIENCE

TelaId — Field Safety Lead Technician

April 2024 - Present

- Conduct field safety and compliance inspections for large-scale radar sensor and security camera deployment projects across multiple active job sites
- Verify adherence to workplace safety procedures, installation standards, PPE requirements, and client site access protocols
- Identify safety hazards, compliance deficiencies, and unsafe work practices - coordinate corrective actions with field technicians and project managers
- Generate detailed compliance and safety inspection reports documenting site conditions, hazard findings, deficiencies, and corrective action status
- Conduct pre-work site assessments and final safety walkthroughs prior to installation activities and client handoff
- Promote a safety-conscious work culture by reinforcing safe practices during daily field operations
- Track recurring safety and compliance issues - recommend process improvements to reduce incident risk across the deployment program

Cell Phone Repair (CPR) — Technical Repair & Safety Technician

January 2022 - March 2024

- Maintained adherence to workplace safety standards and operational compliance procedures within daily repair operations
- Ensured safe handling of electronic components, chemical cleaning agents, and shop tools in accordance with safety guidelines
- Documented operational concerns, recurring workflow issues, and corrective action requirements

- Supported a safe and organized work environment through consistent adherence to operational protocols
- Assisted with workflow organization and process consistency to reduce risk and improve operational accountability

Southern Sentry — Systems Integration & Safety Technician

January 2016 - January 2022

- Performed jobsite safety inspections and installation compliance verification for fire alarm, access control, CCTV, and low-voltage systems across commercial and residential projects
- Identified safety hazards, workmanship deficiencies, and code compliance gaps during field inspections - coordinated corrective action with installation crews
- Enforced safe work practices during ladder work, conduit installation, panel terminations, and system testing activities
- Maintained accurate inspection documentation, corrective action records, and compliance observations throughout project lifecycle
- Supported OSHA-aware operations and promoted safety accountability among field installation personnel
- Conducted functional testing and safety verification procedures prior to system commissioning and client acceptance

L2 Technologies — Lead Technician / Safety Support

March 2013 - December 2016

- Maintained safe and compliant work environments during technical repair and IT support operations
- Enforced proper handling procedures for electronic components, tools, and equipment to minimize workplace hazards
- Documented safety observations, operational concerns, and corrective action requirements
- Supported consistent adherence to operational safety standards across daily repair workflows
- Mentored junior staff on safe work practices, operational accountability, and quality standards

SELECTED PROJECTS

Field Safety & Compliance Reporting Platform

- Developed a cloud-integrated field reporting platform supporting compliance inspection tracking, deficiency documentation, and corrective action coordination across multi-site deployments
- Digitized inspection workflows reducing manual documentation overhead and improving audit traceability
- Enabled real-time deficiency reporting and photographic documentation for safety and compliance findings
- Platform used to support operational accountability and continuous improvement across active deployment projects

Operational Safety Initiatives

- Supported development of standardized inspection checklists and safety compliance documentation for field deployment operations
- Established corrective action tracking procedures improving visibility into open safety and compliance findings
- Coordinated with project leadership to implement process improvements targeting recurring installation and safety deficiencies

CERTIFICATIONS

- OSHA 30-Hour Outreach Training - General Industry, DOL card (2024)
- EM 385-1-1 40-Hour Safety & Health Training - USACE (2026)
- MEWP Operator Certification - aerial and scissor lifts (2024)
- CompTIA Security+ | CompTIA A+
- Dell Certified System Expert (DCSE) | Apple Certified Support Professional (ACSP)
